

WHAT IS GHIAA AND WHAT DOES IT BRING TO THE GLOBAL HEALTH COMMUNITY?

Formally established in 2017, the Global Health Innovation Alliance Accelerator (GHIAA) aims to both facilitate translation of global health policies into actionable agreement provisions and increase transparency on the provisions which address key issues in global health alliances by advancing research, development and delivery for new biomedical technologies. To achieve this objective, GHIAA develops and promotes the use of tools and best practices for global health agreement formation.

WHAT IS THE MAPGUIDE?

Thanks to generous support from the Wellcome Trust, the Master Alliance Provisions Guide (MAPGuide®) is a place to find contractual documents from global health agreements. Real-world examples from public sector, industry, nonprofit, philanthropic, and multilateral institutions show how different alliances approach issues around access, intellectual property, liability, risk and benefit sharing, and more. The user-friendly online platform allows users to find provisions using keyword searches or by browsing by issue, partner type, development stage, and product type.

HOW DOES IT WORK?

Visit the [MAPGuide® website](#) and search by a term of interest. Alternatively, browse provisions by issue (e.g., access to medicines, consortium structure & management etc.) or agreement feature (e.g., technology, partner type, development stage etc.). Click on the relevant link to see the full provision language, as well as GHIAA's analysis of key questions and approaches. You can also download the agreement text in PDF form.

WHO CAN USE IT?

Anyone that needs a contractual document for a global health initiative. This could include ministries of health, industry stakeholders, funders, multilateral organizations, NGOs and universities.

HOW TO CONTRIBUTE

We are seeking additional content for the MAPGuide® in the form of either full agreements or individual provisions, which may be attributed or anonymized. Please [use this form](#) to submit an agreement or provision.

WHAT IS THE GOAL AND VALUE OF THE MAPGUIDE®?

By sharing the MAPGuide®, GHIAA hopes to encourage greater transparency and discussion with all stakeholders on the agreements and provisions that are necessary to form successful global health agreements, resulting in increased access to medicines, vaccines, and related products. We are urging organizations to support this effort by sharing, either in an attributed or unattributed manner, the organization's form agreements, provisions which address key issues, and negotiated provisions which illustrate a best practice for agreeing important terms.
